### Current Patient Chart Immunization

Vaccine Group	M-M-R II-1
Vaccine	M-M-R II-1
Schedule	1-4 Months
Date Administered	11/10/2023
Status	Complete

## The Benefits of Using Iron Bridge for Immunization Registry

DrChrono now integrates with Iron Bridge to empower healthcare providers to securely obtain patient immunization histories and forecasts, and submit applied and historical vaccine data to registries across the nation. Learn how the DrChrono + Iron Bridge integration can improve your immunization registry reporting.

### What is the DrChrono + Iron Bridge Integration?

Iron Bridge creates a secure connection between your DrChrono EHR and the state immunization registry you use for reporting. With a few clicks, you can both view a patient's immunization history and automatically sync new immunization data each time you input vaccinations into your DrChrono EHR.

## Benefits of Integrating

### MIPS Reporting

Simplify data reporting while meeting your Promoting Interoperability reporting requirements.

### Improve Public Health

Automatically sync EHR vaccine records to state registries to enhance public immunization data and improve vaccination rates.

### Save Time

Streamline immunization reporting by using History and Forecast reports so your office staff and clinicians can view due or forecasted immunizations for your patients.

### Patient Safety

Securely retrieve patients' vaccine history and forecast to ensure you're up to date with their immunization history and schedule.

## Three Simple Steps to Add Iron Bridge to Your DrChrono EHR

### Step One

Fill out interest form & an Implementation Specialist will contact you.

### Step Two

Contact your state registry for connectivity credentials.

### Step Three

Begin securely reporting vaccine records to your state registry.
